SHAR-BAR

Congratulations on choosing a Clay Paky product!

We thank you for your choice. Please note that this product and all the others in the rich Clay Paky range, has been designed and manufactured with total quality to ensure excellent performance and best meet your expectations and requirements.

Carefully read this instruction manual and keep in its entirety and keep it safe for future reference.

It is essential to know the information supplied in this manual in order to ensure that the fitting is installed, used and serviced correctly and safely.

CLAY PAKY S.p.A. disclaims all liability for damage to the fitting or to the other property or persons deriving from installation, use and maintenance that have not been carried out in conformity with this instructions manual, which must always accompany the fitting.

CLAY PAKY S.p.A. reserves the right to modify the characteristics stated in this instructions manual at any time and channel list without prior notice.

2. UNPACKING AND PREPARATION

1

Fig. 1 - Packing content

3. INSTALLATION AND START-UP

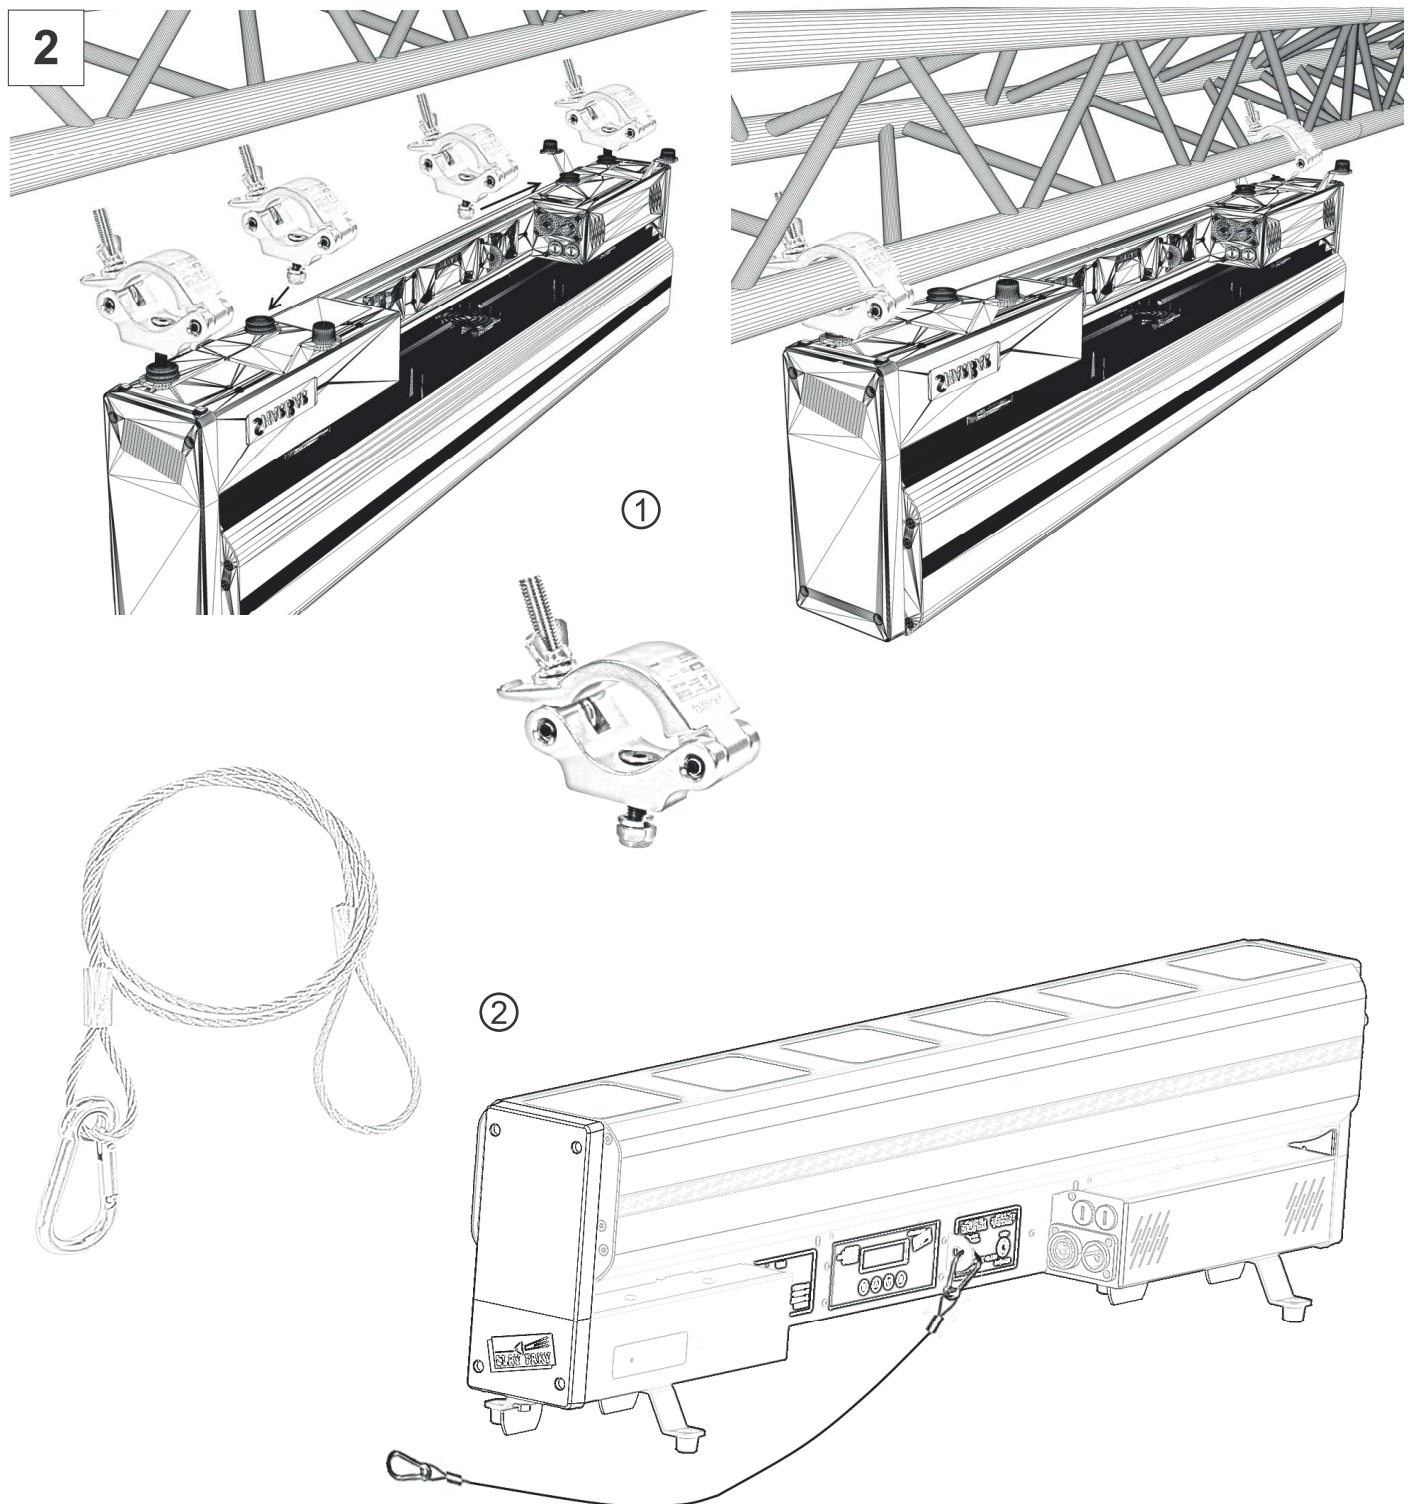

Fig. 2 - Projector installation

The projector can be installed on the floor, on a truss, on the ceiling or wall. **WARNING: the safety chain must be installed except when the projector rests on the floor. (Code 105041/001 available upon request).** This must be secured to the projector support structure and then hooked to the fastening point at the centre of the fixture.

3. INSTALLATION AND START-UP

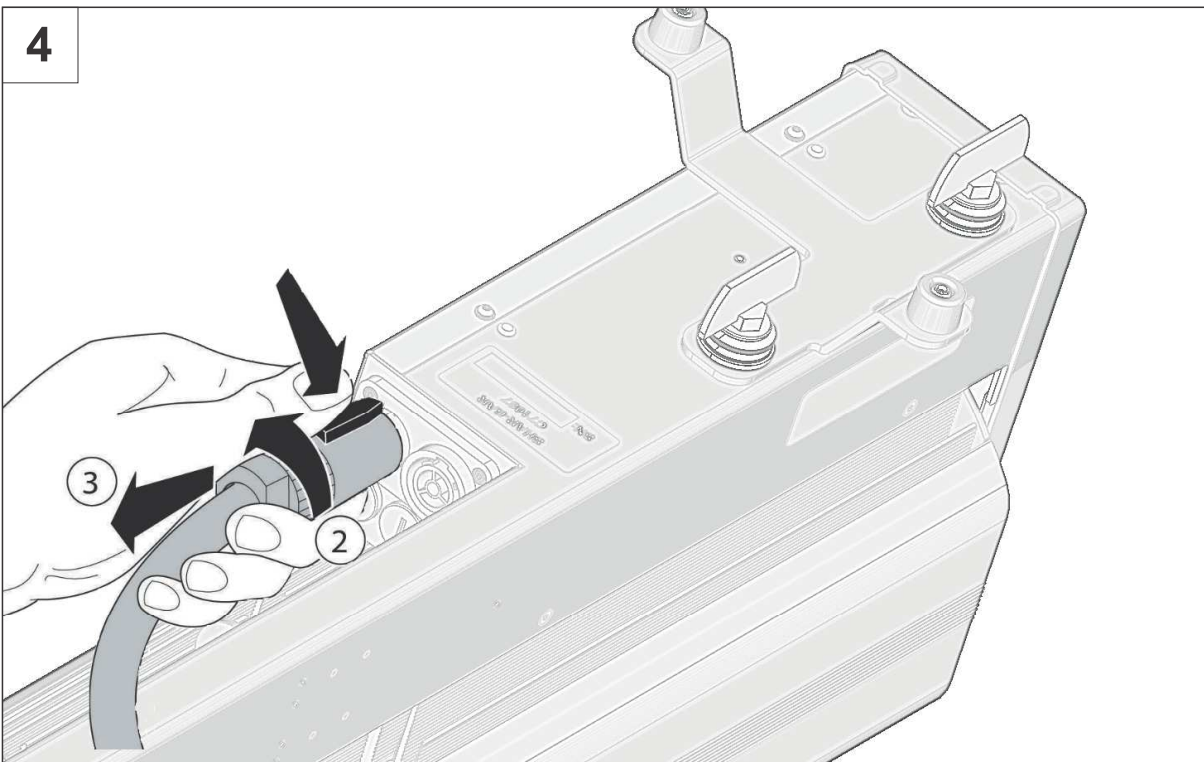

Fig. 3, 4 - Connecting and disconnecting the power cord

4. CONTROL PANEL

5

6

Fig. 5 - Connection to the power mains

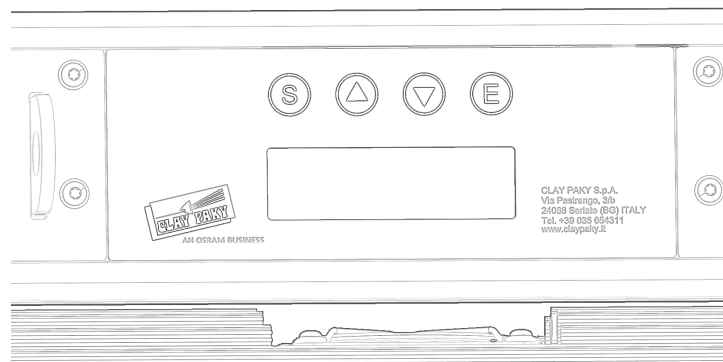

Fig. 6 - Connections to the control signal line (DMX)

Use a cable conforming to specifications EIA RS-485: 2-pole twisted, shielded, 120 Ω characteristic impedance, 22-24 AWG, low capacity. Do not use microphone cable or other cable with characteristics differing from those specified. End connections must be made using XLR type 5-pin male/female connectors. A terminating plug must be inserted on the last projector with a resistance of 120 (minimum 1/4 W) between terminals 2 and 3.

IMPORTANT: The wires must not make contact with each other or with the metal casing of the connectors. The casing must be connected to the shield braid and pin 1 of the connectors.

4. CONTROL PANEL

7

Menu settings status

If no button is pressed after a wait period (about 60 seconds) —————> the display automatically returns to idle status.

Any modified value that has not yet been confirmed with the E key will be cancelled.

Button functions – Menu SET

<p>SELECT</p> 	<ul style="list-style-type: none"> • If pressed in idle status: Cyclically switches between idle status and menu settings. • If pressed while setting a menu: Moves to an upper level without changing anything (exits the function)
<p>DOWN</p> 	<p>Decreases the value displayed (with auto-repetitions), or passes to the next item on the menu. For quick access to the minimum parameter value, press the UP key while holding down the DOWN key.</p>
<p>UP</p> 	<p>Increases the value displayed (with auto-repetitions), or passes to the previous item on the menu. For quick access to the maximum parameter value, press the DOWN key while holding down the UP key.</p>
<p>ENTER</p> 	<p>Confirms the displayed value or activates the displayed function or opens the next menu.</p>

Display inversion

To activate this function press at the same time UP and DOWN keys while the display is in standby.

The condition is memorized and saved even for the subsequent switching. To return to the initial state repeat the operation again.

Fig. 7 - Switching on the projector

The projector immediately turns on when the power cord is plugged

5. MAINTENANCE

8

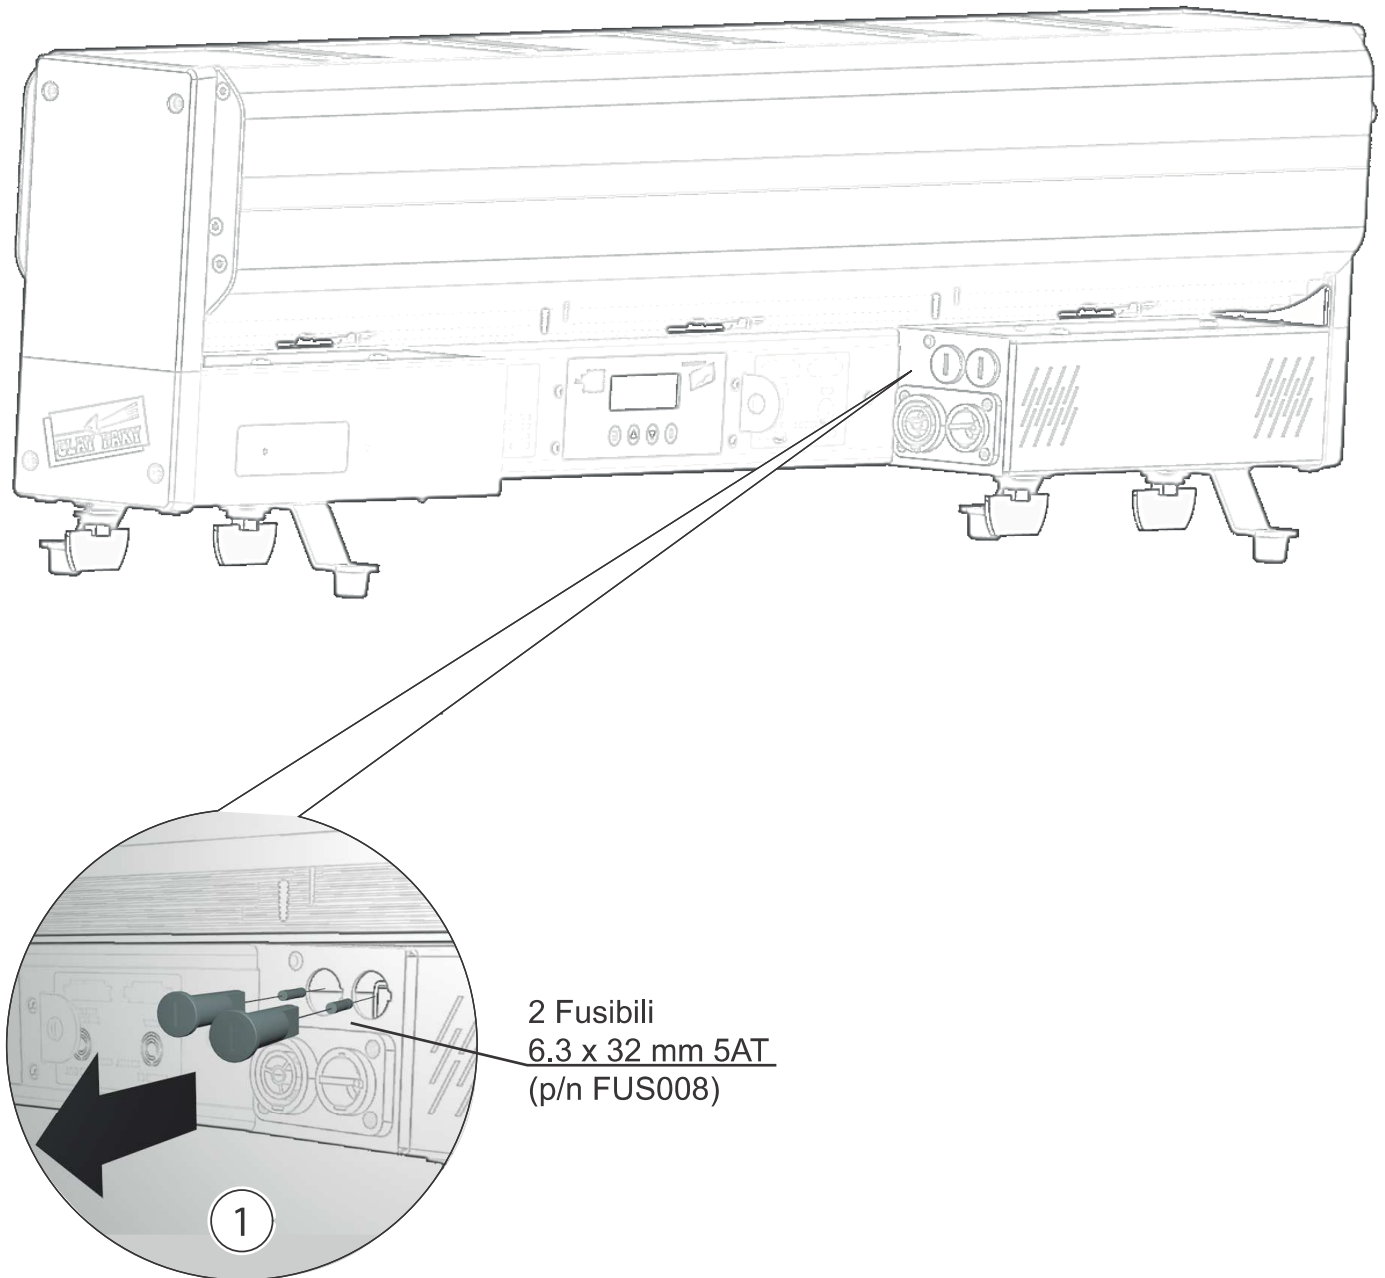

Fig. 8 - **Fuses replacing**

Each product has 2 fuses associated with the main power cord connection.

5. MAINTENANCE

Fig. 9 - **Periodic cleaning**

To ensure optimal operation and performance for a long time it is essential to periodically clean the parts subject to dust and grease deposits. The frequency with which the following operations are to be carried out depends on various factors such as wear and the work environment quality (air humidity, dust, salinity, etc.). To remove dirt from external parts, use a soft cloth dampened with any liquid glass cleaning detergent.

It is recommended that the projector undergoes an annual service by a qualified technician for special maintenance involving at least the following operations:

- General cleaning of internal parts.
- General visual check of internal parts, cabling, mechanical parts, etc.
- Electrical, photometric and functional checks; eventual repairs.

IMPORTANT: Cleaning transparent cover

Only use neutral soap and water to clean the transparent cover then dry it carefully with a soft, non-abrasive cloth. (WARNING: the use of alcohol or any other detergent could damage the transparent cover.)

LIGHT COLLIMATION SYSTEM

This product contains internal light collimation system. Avoid intense light from any angle.

6. TECHNICAL DATA _ SHAR BAR

POWER SUPPLIES

100/240V 50/60 Hz
Automatic power supply

INPUT POWER

300VA at 230V 50Hz

LIGHT SOURCE

6 RGBW LEDs driven at 30 Watt
- Type: OSRAM OSTAR - Stage II LE RTDUW S2WN
- Color Temperature: 6,000 K
- Life: 50,000 hrs

OPTICS

Motorised System with double-mirror optical unit
2° minimum beam angle
2°-12° electronic zoom

COLOR SYSTEM

Independent RGBW system for each LED
Linear Color Temperature Control from 2,500 K to 8,000 K (on dedicated channel)
Color Macros

EFFECTS SECTION

Six beam lights which can work synchronously or asynchronously with respect to each other.
Very sharp mid-air beam effects.
16-bit electronic Dimmer.
Strobe from 1 to 20 flashes/sec.
Color, effect and movement Macros

CONTROL AND PROGRAMMING

Control inputs: DMX cable, Art-Net on Ethernet.
Standard input sockets: Powercon in/out, DMX in/out and Ethernet in/out (Art-Net protocol with internal switch).
User interface: graphic display with four buttons.
DMX protocol signal: USITT DMX 512
Tilt Resolution 16 bit.
Dimmer Resolution: 16 bit.
Strobe 20Hz.
DMX signal connection: 5 pole XLR input and output.
Software upload through DMX input

BODY

Body extruded in black anodized aluminum.
Aluminum and steel structure with plastic covers.
Sockets are arranged within the bar structure itself to prevent interference with adjacent trusses or bars when rotating

MOVING BODY

TILT Angle rotation: 240° (in 0.2 sec).
7 stepper motors, operating with micro steps, totally microprocessor controlled.
2 linear actuators.
Automatic repositioning after accidental movement not controlled by control unit

MOVING MIRROR

PAN Angle rotation: 60° (± 30° mirror movement)

ELECTRONICS

Long life self-charging buffer battery
Electronic monitoring with status error
Cooling system monitoring
DMX level monitoring on all channels
Internal data transmission diagnostics
Firmware upgrade with no power
Firmware upload from another fixture

SAFETY DEVICES

Automatic shut-down in case of power supply overcurrent or overheating.
Automatic derating, in case of LED overheating.
Forced ventilation with fans and heat sink

WORKING POSITION

Working in any position.
Hanging system: with fast-lock omega clamps (1/4 turn) on the base.
Quick fit horizontal and vertical hooks for fitting together in arrays, with possible inward and outward rotation.
Adjustable ground positioning pedestal

WEIGHT

15 Kg (33 lbs)

15 Kg
