

S-500

B04848

BESCHRIJVING

Professionele, DMX-gestuurde sneeuwmachine in flightcase

FUNCTIES

- The S-500 is ANTARI's latest snow machine.
- The unit produces very large amounts of artificial snow that perfectly imitates real snow on stage!
- The air volume and fluid flow rate can be adjusted via DMX to get the right snow effects needed, from fine snow to blizzards.
- The nozzle is equipped with a 10m long air hose and can be easily mounted on a stand or in truss, using a standard clamp.
- The nozzle can also be fixed on the optional PM-1 (120°) pan motor to cover a larger area for the snowflakes.
- Perfect for use by rental companies: the complete snow machine, including a 20 liter fluid tank and 10m air hose, comes in a strong flight-case. The flight-case has a small access door for the air hose so it can be closed for silent operation. (theaters)

SPECIFICATIES

Algemeen : Reeks	Nee
Algemeen : Afmetingen (cm)	59.2 x 55.1 x 6.51 cm
Algemeen : Gewicht (kg)	37.2
Algemeen : Stroomvoorziening	AC 240V, 50Hz
Algemeen : Energie label	Nee
Algemeen : Stroomverbruik W	890
Algemeen : Kleur	zwart
Algemeen : Display	LCD
Algemeen : Bevestiging	optional standard clamp
Algemeen : IP rating	indoor
